

RANSOM

FALL WINTER 2010

Go forth onto the never ending path

In the third installment of the ongoing collection, Ransom by adidas continues upon its established program as well as bringing forth three new silhouettes to update the winter offering. New materials are brought into play to suit the season, heavy duty oiled leathers and waxed canvases are utilized to better serve the elements at play. In addition, wools are used for a touch of warmth

and to bring an added element of luxury into the range. No details are spared in the final result, from the embossed sheepskin insoles to appease your tired feet, to the lambskin lining which will keep you warm on cold winter mornings.

RANSOM HOLDING COMPANY

Ransom was founded as a destination retailer renowned for pioneering a unique point of view that skillfully meshed their outlook and lifestyle to the brands and goods they carried. Offering an international brand selection, the clothing is expertly curated at its stores across Canada, for a devout and informed customer base. Ransom also designs and manufactures a modern collection of apparel and accessories, available at its own stores and select retailers worldwide.

Never remaining quiet; always looking to innovative products that suit their lifestyle. Ransom draws from experiences that are all its own.

(fig. 4.1)*

THE CREST

THE CREST shown sitting on deadfall at the base of the Stawamus Chief waterfall which is the second largest granite monolith in the world. The falls takes its name from the First Nation village of STA-a-mus at the north end of the Squamish River.

*Color Plate
(fig. 4.2)*

THE BLUFF MID

BLUFF - seen here near the base of Mount Garibaldi, one of the most famous peaks in the Squamish Valley, and one that began a century of connection between climbers and the greater Squamish area. The volcanic mountain, named after an Italian political figure, was first conquered in August 1907 when a group of climbers known as the Vancouver Mountaineers reached the summit.

(fig.8.1)*

THE STRATA

STRATA- displayed amongst the rock formations along the Howe sound, the Strata; so named after a geographical term relating to layers of rock or soil with internally consistent characteristics. Fitting in its surroundings as a small out-crop of volcanic rock is located on the eastern shore of Howe sound.

*Color Plate
(fig.8.2)*

THE VALLEY HIGH

THE VALLEY HIGH, seen situated on some of British Columbia's lush timber. Forestry has long since been one of western Canada's top industries, British Columbia alone holds approximately half of Canada's total softwood inventory, as timber harvests supported a large part of B.C's economic development in the early 1900's.

Color Plate
